

Username and Password Information

This guide covers the following topics:

- Your default username and password
- How to change your password on first login
- How to change your password
- Logging in while on campus
- Logging in on your own device

Your default username and password

When you enroll onto a course, you will be given a college email, username and password.

Username

Your username is: The initial of your first name Followed by a full stop Followed by your surname e.g., j.bloggs

Note: Your name may also require a number afterwards if it is a common name, e.g., j.bloggs4

Password

Your password is: Your date of birth in an 8-digit format DDMMYYYY e.g., 07061982 Followed by AWc! e.g., 07061982AWc!

Changing your password on first login

When you log on for the first time, you **MUST** change your password to one of your own choosing. Your password must:

- Be at least 12 characters long
- Contain at least one capital letter
- Contain at least one number
- Not include your name
- Not be too similar to (or the same as), your previous 11 passwords

If you don't meet all of the requirements above, then you will just get a message saying your new password does not meet the system requirements. So please try again with a different password.

Please note: your Password will NOT expire. However, if you think that somebody knows your password and can access your account, then you should change it straight away - and of course it's good practice to change your password regularly and to not use the same password that you might use for other logins.
